	Examiner Phuoc Tran	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2621

1. Applicant's election with traverse of Species I which includes claims 1-10 in the reply filed on 8/20/04 is acknowledged. The traversal is on the ground(s) that the claims are not directed to inventions that are independent and distinct, and the examiner would not be burdened by examining all claims in the application. This is not found persuasive because applicant fails to submit evidence or identify such evidence now of record showing the species to be obvious variants and the search and examination of other inventions (claims 11-35) would be a serious burden on the examiner because the search and examination required for claims 11-35 are not required for claims 1-10. For example, if claims 11-35 were examined, a search in class/subclass 382/260, 205, 282 would be required. A search in such areas is not required for claim 1-10.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 11-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/10/04.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Lee [U. S. Patent No. 6,463,175].

Lee discloses a method of compensating for distortion at an edge of an image during image processing, said method comprising: detecting the edge in the image (Figs 3, 4, 5; col. 6, lines 5-67); and sharpening the detected edge, wherein the degree of sharpening is directly proportional to a degree of distortion in the image (col. 9, lines 34-37, lines 59-64; also Figs. 3, 4, 5 show that an edge is sharpened according to a degree of distortion in the image).

5. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kojima, Nakayama et al, Okubo disclose the state of the art of image processing.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (571) 272-7399. The examiner can normally be reached on MON-FRI.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on (571) 272-4753. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
